## Professional Summary

Junior UI/UX Designer focused on creating intuitive, user-centered digital experiences that balance user needs with business goals. Skilled in user flows, wireframing, prototyping, and interface design, with a foundational understanding of front-end development to support practical design decisions and effective collaboration with developers.

## Skills

- **UX/UI Design:** User Flows, Wireframing, Prototyping, User Research, Information Architecture, Usability Testing, Design Systems, Responsive Design
- **Design Tools:** Figma, Adobe Illustrator, Adobe Photoshop
- **Front-End Foundations:** HTML5, CSS3, JavaScript, React.js, Tailwind CSS
- Soft Skills: Communication, Collaboration, Problem-Solving, Attention to Detail

## Projects

**Captain Cash – Gamified Financial Education Platform for Kids** | ITI Graduation Project (Team Project)

- Worked with the team on the full design of a gamified financial-literacy platform for children aged 7–11, with missions, saving goals, an AI companion and a companion app for parents.
- Individually designed the game experience.
- Took part in user testing with 5 children and 6 users: most found the experience smooth, and the children responded positively to the game and were looking forward to its release.
- MVP scope covers saving, budgeting and responsible spending.
- Case study: https://www.behance.net/gallery/253243205/Captain-Cash-The-Future-of-Financial-Literacy-for-Kids

**Diasyti App – The Folk Exchange** | Personal Project

- Designed an app inspired by the Egyptian series "Basant & Diasyti" that helps people face inflation through collective buying power and knowledge of real market prices.
- Case study: https://www.behance.net/gallery/248344235/DIASYTI-APP-The-Folk-Exchange-%28UXUI-Case-Study%29

**Safari – Luxury Safari Booking Website** | Personal Project

- Designed a safari booking website covering destination exploration, package comparison, trip details and booking.
- Designed an admin dashboard for managing trips, bookings and customer data, with a desert-inspired visual identity (earthy tones, photography-led layouts).
